# WEB DEVELOPERS, SEO SPECIALISTS, INVENTORY ASSISTANTS, AND MORE!

## Serve Your Customers Better.

People are buying different goods and shopping differently, but they're still buying.

The difference between retailers who continue to grow amid the COVID-19 pandemic and those who struggle is how ready they are to meet and serve customers online.

In June 2020, visits to retail websites all over the world reached 22 billion, which was more than in the holiday shopping season in December 2019, Statista reported.

For retailers who are new to ecommerce, experienced Virtual Assistants can support them in several ways: from developing and maintaining their online stores to making sure potential buyers find them easily. Processing orders, responding to customers' queries, managing inventory, and marketing to the right communities are all key, time-consuming tasks online retailers can delegate to a skilled VA.

If you've never worked with a VA before, that's OK. We'd be happy to answer your questions!
