

## ***Company Profile – about us***

We are the Southern African distributors of a number of specialised, world renowned cyber security products and solutions serving Commercial & Government Organisations, Internet Service Providers and ISP's/Telco's.

These range from Network Vulnerability Detection and Management Systems, Carrier Grade Botnet mitigation systems, Email filtering, archiving and management solutions to Mobile Device Management and Secure Mobile Phones.

### **HISTORY**

SeKure-IT has a proud history of supplying IT security solutions to prominent companies in Southern Africa. These include large, medium and small companies as well as Government and Parastatals in South Africa, Botswana, Swaziland and Zambia.

SeKure-IT was founded in 2006 by Hilton Loewenstein and initially commenced business as a reseller of email/web security systems. Since then, SeKure-IT has evolved into the Southern African distributors for many leading Cyber Security brands.

Hilton has over 25 years' experience in the Telecoms and IT industry, including many years as a member of the executive management team at Siemens.

SeKure-IT partners with a number of Managed Service Providers, specialized IT Service Companies and IT Resellers to provide a full suite of services to Southern African customers.

In addition to providing tailored solutions to meet customer requirements, rapid and responsive life-cycle support of the highest standard is available for each of the specialised solutions offered. Over the past 13 years, SeKure-IT's successfully implemented solutions can be found throughout Southern Africa.

### ***The SeKure-IT value proposition: World-Class Solutions, Excellent Value, Unrivalled Support***

SeKure-IT offers a choice of products and solutions to meet very specific data security requirements, at an affordable price with innovative financing options. These solutions can be easily implemented with minimal risk and are available for testing, evaluation and PoC's in the client's own environment.

**SeKure-IT's award winning products, combined with comprehensive, high-level technical support, provide our clients with peace of mind of knowing that their environment is controlled, managed and protected at all times.**
