MAG Super Dry Hand Dryer - Fast, Efficient, and Hygienic!

The MAG Super Dry delivers a quick and effective hand-drying experience in just seconds, making it ideal for high-traffic environments such as hospitals, office buildings, shopping centres, gyms, and restaurants.

The SD-100 Hand Dryer features an award-winning design and incorporates a warm-air recycling system that improves thermal efficiency by speeding up the warm-up process. The MAG Super Dry is your best choice for bathrooms or other spaces where hand drying is a preferable option.

Features:

- Quiet Operation: Minimal noise while ensuring maximum efficiency
- Touch-free, hygienic design: No buttons, reducing the spread of germs
- Energy-saving performance: An eco-friendly, cost-effective solution
- Durable build: Robustly designed to handle constant use - The robust alloy case is resistant to vandalism and easy to clean.
- Award-winning design: A modern look that complements any bathroom
- It also includes an automatic cut-off for added safety.
- Its aerodynamic design reduces both drying time and power consumption, while the motor vibration isolation system ensures minimal noise.

Activation:

The dryer is activated by placing hands directly beneath the infra-red electronic sensor, or by using the unique air-directional flap, which directs air upwards for quick face drying - It's recommended to keep eyes closed or protected during face drying.

Safety:

For extra safety, the SD-100 is equipped with two overload sensors that automatically cut off the motor and heating element when needed.

SKU: SD-100
