Utility ENERGY PLANS

Utility meter dashboards to help you manage your energy use and costs

Reduce your electricity, gas and water consumption by up to 25%.

Utility's energy efficiency plans gives you crucial insights into your electricity, gas and water consumption and guides you to ongoing energy savings. **The following 3 plans are available:**
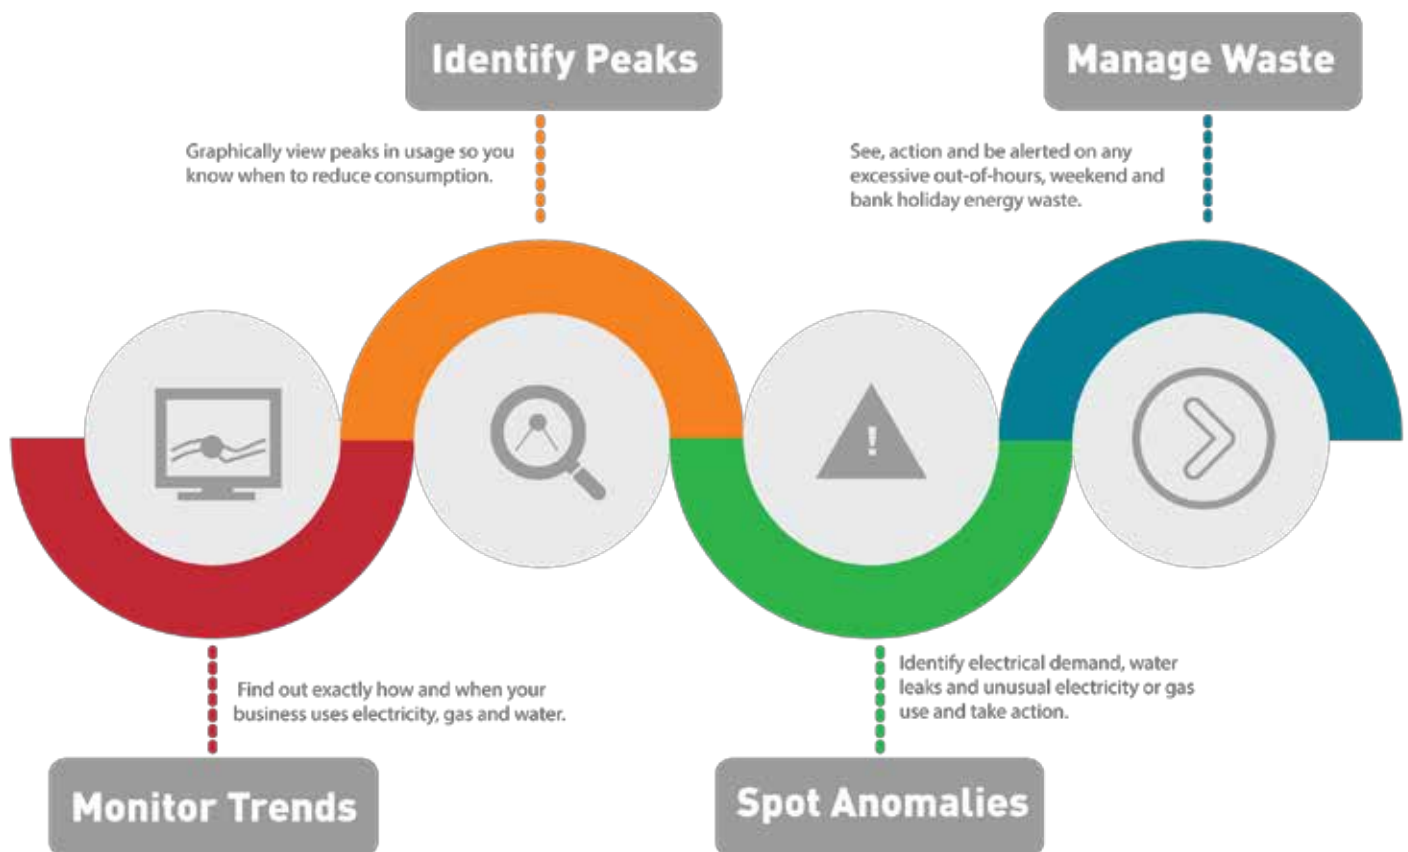

Utility**SMART**

Smart Meter & P272 meter software, incl. consumption, cost & peak demand monitoring.

Utility**SAGE**

Shadow Metering, Bill Auditing, Real time energy monitoring. incl. Power quality management.

Utility**SCAPE**

Multiple meter & site dashboard, Cost & Consumption. Multi-site comparisons.

Identify Peaks

Graphically view peaks in usage so you know when to reduce consumption.

Manage Waste

See, action and be alerted on any excessive out-of-hours, weekend and bank holiday energy waste.

Monitor Trends

Find out exactly how and when your business uses electricity, gas and water.

Spot Anomalies

Identify electrical demand, water leaks and unusual electricity or gas use and take action.

## Highly visual, easy to use electricity, gas, water and renewables monitoring.

Utility Energy Plans takes complex data from your smart meter, half-hourly meters and makes it easy to understand where there's energy waste and track improvements made.

Utility Energy Plans helps you monitor your energy consumption so you can stop wasting energy and water, then start and continue to make savings. You can immediately access your water and energy use from our App or your computer. Utility Efficiency Plans are a great tool in your fight to reduce your energy and water costs and carbon reduction.

How It Works?

Data is converted into clear and simple energy use and cost charts that show you how much energy and water your business is using and costing you.

You can set energy reduction targets, alerts and reports to help you manage and achieve your energy efficiency goals. Check your electricity, gas or water energy use and costs whenever and wherever you want*. Our plans scale from single meters to many meters in many locations.
