

Protect Your Business' Reputation

We are living through a technological revolution which brings huge opportunities but with this, also unknown risks. The recent large-scale cyber attack that hit the NHS caused massive disruption to hospital and GP appointments. There are plenty of other examples of large and small to medium size businesses being hit.

Can you afford to be one of those businesses?

Cyber crime is now more than a Trillion Dollar a year business and according to a recent press release in 2017, half of UK firms were hit by a cyber attack in 2016.

GDPR (EU's General Data Protection Regulations)

While Brexit continues to generate headlines and a high level of uncertainty (and confusion!), what we do know is that it will not affect the introduction of the GDPR on 25th May 2018. It's coming and we need to be ready to deal with it. Penalties for a breach will reach an upper limit of £18 million or 4% of annual global turnover – whichever is higher.

At HR Solutions Team we have a team of IT Cyber specialists who are experts in their field who work with our HR Specialists and your business to help protect your valuable assets from Cyber crime and get you GDPR compliant.

Get in touch to find out how the HR Solutions Team can help your business.
