Call us today on 0113 8662101 to tell us what you need and how TV Aerials Leeds can help you.

Free View Aerials Leeds

TV Aerials Leeds can install a free view aerial, enabling you to receive all the available free television and radio channels. Free view aerials are most commonly installed onto the roof of a property however it is also becoming more common to have free view aerial installed within the loft space. A booster could also be used to maximise the range and create maximum reception, the free view aerial can also be relayed via cabling and split into several rooms within the property. Having a free view aerial installed increases the number of channels picked up as well as enhancing the picture quality. The standard free view aerial is mounted on a pole and is effective in areas of good reception, in areas of poor reception quality a high gain free view aerial would be required. Free view aerials can work with a set top box or a television with free view built in. TV Aerials Leeds can identify whether free view is your best option and if not, there are alternatives such as Free sat, please feel free to check out our Free sat page for further details.

Freesat Satellite Dish Installer Leeds

Freesat Satellite is a Free digital satellite TV service brought to you by the BBC and ITV. There are over 150 FREE channels available and this is due to increase. Over the next few years around 200 extra Channels will transmit, including HD and at some point 4K . TV Aerials Leeds can install everything that you require, we can set you up with a Sky mini dish connected into your property via a single or dual cable for Freesat Plus. At TV

Aerials Leeds we feel that this option is ideal for people who live within a poor reception areas or have to get there TV signal via a Relay where they only get 20 – 30 channels.

No Monthly Subscription

As the name suggests, Freesat is available without any subscription charges. There is just a one off fee for the Freesat satellite dish equipment and installation but the BBC has announced that their system will remain free forever. But unlike the Old Sky Freesat system, there is no viewing card required to unlock scrambled channels; in fact, there is no card required at all, just plug into your TV and enjoy. So for more information on Freesat and also Freesat+ and Freesat HD please click on the link <http://www.freesat.co.uk> or just give Gary a Call at TV Aerials Leeds.

Satellite Dish Or TV Aerial Alignment For Leeds

In order to receive a perfect satellite or TV Aerial reception, your satellite dish, and Aerial needs to be pointed in the right direction. If you are experiencing problems with satellite or Freeview TV channel reception TV Aerials Leeds have experienced engineers that can give you advice on whether or not you need repairs or re-alignment.

Repairing And Aligning Sky And Satellite TV Aerial Systems. Sometimes, it is possible for your satellite dish and aerial to move around. Maybe the mountings have become loose and your dish has dropped slightly. Or the weather could've shifted it to the side, leaving you with a weaker signal.

You may not notice on a fine day, but do you lose some channels or experience 'picture break up' on a cloudy day?

TV Aerial Leeds can send out one of our Freesat installers or TV Aerial repair engineers to check the alignment of your dish and even show you the results using our specialist equipment, giving you a guarantee of quality workmanship and value for our services.

Your satellite dish or Aerial may not need repairing, but may simply need re-aligning. Satellite dish re-alignment involves correcting the angles at which the dish sits as is it is mounted to a surface, usually a wall on the outside of your home. When your satellite dish was originally installed, the engineer carrying out the installation would have had prior knowledge of the position of the most relevant satellite in orbit for transmitting the television signal to your home.

Then, during the installation, he would have positioned the satellite dish on its' wall mountings in the approximate direction of the satellite transmitter. Once the installation was nearly complete, TV Aerials Leeds would then use some specialist equipment called a spectrum analyzer to adjust the angle of the dish with enough precision to achieve a good quality reception.

So Book your Alignment Engineer at Aerial and satellites Leeds Today.

Communal Satellite Engineers Leeds

Leeds have hundreds of apartments around the city and all have Communal Satellite Systems. Furthermore, TV Aerials Leeds have worked on almost every TV system in Leeds and they are completely different. This is in the way that they are planned compared to a domestic aerial or satellite system. But this is where TV Aerials Leeds can help because it stands to reason that if one aerial is to be able to be used by 10's, 100's or 1000's of people. All with perfect TV pictures and it acts like your own aerial, then it needs to be matched up, balanced and made safe.

The first thing to think about IRS Systems nowadays is that when designing an aerial and satellite system, you must build in the ability to receive digital SKYQ, CCTV, and European and Asian TV Channels. It stands to reason that if all TV aerial transmitters are going to be switched over to SKYQ digital (some have already gone Q digital), then you **MUST** make allowances for that in any design.

For More Information On Communal SKY Systems Visit Here Now.

Projector Screen Installer Leeds

Your HD projector is an indispensable piece of AV equipment for any space in any home or business. Whether it be large or small we will be there to help install it for you. It has been the default way to display content in school halls, university lecture rooms, and office boardrooms for decades, and the reason is simple: a projector is very price efficient. Where a large television screen can be incredibly expensive, a projector can achieve an image of the same size and readability for a minimal cost.

At the same time, a projector needs to be installed properly in order to work optimally, and that's where we come in. TV Aerials Leeds are the specialists in high-quality projector installations in Leeds.

What you need to know about Leeds projector installers

Projectors that are installed poorly will degrade quickly, or fail to display a crisp, clean image on the screen. In order to install a projector properly, it's important that you understand the dimensions and conditions of the room, as well as the way that the projector itself will be used.

At TV Aerials Leeds, we are well known for the effort that we put into each projector installation. Leeds businesses that we service appreciate that we take the time to properly get to know what their specific needs are, and how they'll be using the projector. From that discussion, we'll then be able to recommend the optimal set up that will allow you to get the most from your investment.

So Contact TV Aerials Leeds to Book Your Projector Screen Installer

Home Cinema System Installations Leeds

With over 20 years of delivering home cinema projects, TV Aerials Leeds help you choose from the vast array of equipment available on the market, we then design a home cinema system to suit your requirements and (importantly) your budget. We have the complete team to deliver your project – all managed by ADI Communications.

Also, TV Aerials Leeds partner with all the home cinema equipment manufacturers to bring you the latest and best range of solutions which are user-friendly and deliver quality results. For an initial discussion about your requirements and to receive our advice and guidance (which is always free!) please call us on **0800 0132341**

HDMI Multiroom Distribution Leeds

HDMI multiRoom Distribution Systems Installed by TV Aerials Leeds are nothing but amazing, our products let you create any size of 4K or 1080p HDMI matrix using a 1 Gb network and Cat 5e/6 cabling, and can be implemented in residential and commercial installations across Leeds. Any combination of inputs and outputs is possible, and the system can be easily expanded to accommodate additional sources and screens across your Home or Office.

TV Aerials Leeds is the audiovisual industry's award-winning option for advanced HDMI distribution. Our products have been designed and engineered by a global team of AV specialists with over 25 years experience. Research highlighted the market need for an AV distribution brand that could deliver both industries leading performance and most importantly reliability.

4K TV Installation Service in Leeds LS1

To put it simply, TV Aerials Leeds 4K TV Systems allows you to distribute all your video sources such as Sky, Virgin Media, Blu-ray, Apple TV, and your HD games consoles to any television in your home. With this technology, you can also control the devices from every location using a remote control or an app on your smartphone or Ipad. For example, you can start watching a film in the living room, pause it then move to the bedroom and watch the end from the comfort of your bed.

Maybe you want to relax on the sofa after banishing the kids to another room with a TV? Or distribute one video device to multiple TV's around the home at the same time. It's simply Endless with our HDMI Multi-Room Distribution Systems. **Contact Leeds HDMI Systems Engineers to get a free Quotation**

Let TV Aerials Leeds come and help to configure and maintain your Sonos music system. Transform any room into a state-of-the-art home theatre. Watch TV, access your movie collection, play video games and easily stream films from the comfort of your own home, TV Aerials Leeds pride ourselves on a quick and professional service with no call out charges.

Sound Bar Installation Leeds

One of the big questions that TV Aerials Leeds is often asked is What is a Soundbar? A sound bar is the simplest way to improve your TV sound without adding a full 5.1 surround sound cinema system. If you don't have space or want to have a home cinema system, then the good news is a Soundbar provides an excellent alternative. Soundbars are also fairly easy to set-up and can be configured with pretty much any Modern Flat Screen TV on the market.

With wireless subwoofers, wireless Bluetooth music streaming, Network Access, HDMI & Optical connections, there's a something for everyone. Modern TV's now use flat-panel technology which allows the enclosure of the TV to be incredibly thin compared to the old 'tube' Tv's of yesterday. From their stylish looks and room friendliness, Flat screen TV 's are a huge improvement with just one drawback.....The Poor Sound quality!

By adding a Soundbar, or add-on speaker system, you can dramatically increase the quality of your sound to a degree where it is every bit as good as the TV picture quality itself. If you wish to upgrade the TV at any time, you can simply keep your sound bar and use it with your new TV, as long as it has the correct audio outputs, which are now pretty standard on all new modern TV's. If you need further advice, please contact TV Aerials Leeds and we can help.

★★★★★ Dec 20, 2018 by Mags on TV Aerials Leeds

Fab job lads, aerial installed into my new house cheers

★★★★★ Dec 20, 2018 by Gareth Bracewell on TV Aerials Leeds

Freesat

I got rid of sky as it was too expensive and bought a freesat box, i rang TV Aerials Leeds who came and set up the freesat for me, using my existing dish. They were punctual and reasonably priced. Fantastic bloke too. Thanks

★★★★★ Dec 20, 2018 by Eve Llewlyn on TV Aerials Leeds

Aerial

My aerial cable was leaking water, i rang TV Aerials Leeds and Pete came and explained that the water was actually running down from the aerial. He replaced the aerial and cabling and everything is working perfect cheers

★★★★★ Dec 20, 2018 by Geoff on TV Aerials Leeds

Phone Problem

I needed a phone line in the kitchen so I rang Gary and he came and fitted me a new line within 2 days. No messing half the price of BT and he also sorted a wifi problem out for me while he was here with no additional charges

★★★★★ Dec 20, 2018 by Patricia Kay on TV Aerials Leeds

Sorted my aerial within 20 mins, would recommend TV Aerials Lees to anyone. 1st class

★★★★★ Dec 20, 2018 by Harry Simmons on TV Aerials Leeds

CCTV

TV Aerials Leeds came and installed 4 cameras at my property, excellent job, very knowledgeable bloke. Cheers Gary we are very happy with the job

★★★★★ Dec 18, 2018 by Lynda Brook on TV Aerials Leeds

Sky Sorted

My dish had been knocked out of alignment by the builders and the kids whole world fell apart!! Luckily I called TV Aerials Leeds and they arrived the next day and fixed the problem. Fast, effective and very polite. The office staff were helpful and the engineer was polite and friendly. I would definitely recommend the firm to my family and friends.

★★★★★ Dec 18, 2018 by Jack Smith on TV Aerials Leeds

TV Problems

Thank you to Pete who came and installed an extra aerial socket in the bedroom, now that the grandson is old enough to stay over we wanted him to have a television in his room. Tidy and clean the service was first class. Thanks lad

★★★★★ Dec 18, 2018 by Andy Micklethwaite on TV Aerials Leeds

Pub Sports

Cheers to Gary for coming and sorting out the pub sky situation, he is really knowledgable and helpful and i will definately use him again if i have any issues. Two weeks faster than sky and a hell of a lot cheaper! Extremely greatful

★★★★★ Dec 18, 2018 by Bren Sheridan on TV Aerials Leeds

Internet Trouble

I needed the hub resiting but was looking at a 3 week wait and a hefty bill for BT to come out and sort it for me. A friend who had used Gary before gave me his number and he had the job done within days. I even has an extra socket installed into my bedroom and all at less than BT were chatging to do one job!! Highly recommend
