## WHAT IS SEND?

Educater's SEND module is an innovative approach to creating and managing the processes for Education, Health and Care Plans (EHCP) and Individual Education Plans (IEP), as well as dramatically reducing the administrative burden for SENCOs and educational staff. The aim of SEND is to help create person-centred approaches with a strong emphasis on positive engagement with children and their families. In order to do this, Educater SEND can incorporate any Local Authority's EHCP and IEP, making it accessible, any time, from anywhere.

## HOW CAN SEND BENEFIT YOU?

**Improves communication between professionals and families** – as well as bringing together education, health and care teams through the online platform. SEND also provides a central focal point for schools and outside agencies, enabling them to contribute towards the EHCP process, ensuring that outcomes are positive for the individual who is placed at the centre of the plan.

**Manages your time and workload with a few clicks** – Educater SEND is a great way for educational staff to learn about their pupils' needs and helps towards making every teacher, a teacher of every need. Educater SEND breaks everything into simple, manageable chunks.

**Helps to meet the reduced 20-week statutory time-frame** – by providing better management of the EHCP process, our SEND software provides a quicker turnaround and ultimately supports actions for pupils resulting in more effective learning.

## KEY FEATURES

Produces 'new', 'transfers to,' and 'reviews of' EHC Plans directly within Educater across multiple Local Authorities, as well as IEPs or your equivalent.

Pre-populates with information already held in schools' MIS systems, such as SIMS, RM Integris and Facility CMIS etc.

Generates personalised and specific correspondence to those with parental responsibility.

Automatically distributes questions internally for staff input.

Generates alerts for outstanding responses.

Requests input from Health Care and Social Care.

Splits the EHC plan to prepare parent packs and meeting packs.

Facilitates submission to local authorities.
